

Object::getMatrix

Object::updateRotationMatrixY

translateMatrix

```
graph LR; A[Object::getMatrix] --> C[translateMatrix]; B[Object::updateRotationMatrixY] --> C;
```

The diagram illustrates a dependency or data flow. Two source methods, 'Object::getMatrix' and 'Object::updateRotationMatrixY', are shown in white boxes on the left. Two blue arrows originate from the right side of these boxes and point towards a single target box on the right labeled 'translateMatrix'. The target box is shaded gray, while the source boxes are white with black borders.
